# What Mower Is Best For You???

## **Walk Behind Mowers**

As we swing into Spring there are a few mower questions that arise; what type of mower do I need, where is the best place to buy a mower, how much money am I going to spend? All great questions with many different answers, but let's see if we can at least simplify it for you.

Determining what type of mower you need is where you rely on a knowledgeable sales person. They will ask you questions like; how much area are you moving, what type of grass do you have, how is the terrain? If those questions are not brought up, then is that the right person or place to be purchasing from?

As a locally owned equipment dealer, we make it our business to determine what your needs are. Assembly of product is done by trained Techs in our shop, we start and test each unit prior to sale and all warranty and regular maintenance is done at the selling dealership. Your long term satisfaction is our goal. We even take care of registering your product warranty and keep a copy on file for you.

In the next area is a sample of some of the walk behind mowers that we carry with features and list prices. This is just a few of the models we have, not to mention the Riding Lawn Tractors and Zero Turns we also carry.

Come on down and let one of our experienced sales people help you make the best decision for your mowing needs!
